

Sept. 2023

This list of prices for Carol Evans prints on the secondary market has been compiled in consultation with some of our major galleries. Although we don't encourage the buying of art as a financial investment, it does have a value that can be expressed in dollar terms. These prices are an average of suggested prices, and they are intended to be used for insurance purposes only.

If, on this list, the Current Market Value exceeds Issue Price, you can assume that the print has been sold out and is available only on the secondary market. If the Current Market Value is the same as Issue Price, it is probably still available through galleries at the original list price, or Artists Proofs may be available at a slightly higher cost.

The secondary prices that have been established here generally reflect gallery resale prices. (prices are shown in Canadian funds)

Title _____	Issue Price _____	Year issued _____	Current Market Value _____
Afternoon High Tide _____	\$305.00 _____	1995 _____	Sold Out _____ \$1100
